Webinar

Coding and thinking design for building skills in computer science

In the framework of European initiative *STEM Discovery Campaign 2020*, EU-Track Association, is organizing the webinar "*Coding and thinking design for building skills in computer science*".

This event is addressed to headmasters, teachers and experts who wish to discover how to encourage, mainly girls, on developing thinking design skills and starting computer science careers.

It will be an opportunity to learn about the tools and methodology developed by the Coding4Girls project team and to know how experts, teachers and students can participate in their validation phase.

16 April 2020, at 15:00

AGENDA

15:00-15:15	Welcome *Michela Tramonti – Vice Presidente EU-Track*
15:15-15:30	Coding as Cross-curricular competence *Prof.ssa Maria Cristina Bevilacqua*
15:30-15:45	Design thinking approach and C4G software: how to develop coding skills in young students. *Michela Tramonti – Vice Presidente EU-Track*
15:45-16:00	Q&A
